## DETAILED ACTION

Claims 1-65 are pending in the application.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-13 and 22-34, drawn to a method, classified in class 514.
- II. Claims 14-21 and 35-45, drawn to a method, classified in class 514.
- III. Claims 46-54, drawn to a method of screening, classified in class 435.
- IV. Claims 55-59, drawn to a method of assaying, classified in class 435.
- V. Claims 60 and 61, drawn to a product.
- VI. Claims 62-65, drawn to products, classified in class 548, subclass 484+.

The inventions are distinct, each from the other because of the following reasons: Inventions of Groups I and II and Group VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using can be practiced with a materially different product. Different search considerations are involved with each of the groups listed above and would impose an undue burden on the Examiner and the Patent Office's resources if unrestricted.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and the search required for Group I, for example, is not required for Group III, restriction for examination purposes as indicated is proper.

**Additionally, Applicants are required to elect a single disclosed species (e.g. Example number and page number) from whichever group is ultimately elected.**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
